The Presiding Judge shall have final say in any matter pertaining to the contest if called upon, and shall have the authority to exclude or disqualify any exhibit(s) for good cause. The Judge(s) shall have the final say in regard to the evaluation of any and all exhibits. The decisions of the Judge(s) are final. After the announcement of awards, any exhibitor may meet with the class judge to discuss their exhibit and ask questions.

Appeals:

The show room will be open to exhibitors for a reasonable interval (typically 10-20 minutes), after the announcement of awards, but prior to opening to the public, to allow for any appeals. An Exhibitor may appeal the Bench Judge's ruling concerning their own exhibit in instances where the Exhibitor believes the Bench Judge misinterpreted or misapplied a rule in regard to the judging of their exhibit. The Exhibitor must first present their protest to the Bench Judge who judged their exhibit, and calmly and clearly state the basis for their protest. The Bench Judge should hear the Exhibitor out, and then typically should explain to the Exhibitor the basis for their initial decision and discuss the Exhibitor's

concerns with them. The Bench Judge, together with the Exhibitor, will then bring the protest to the Presiding Judge. After hearing both sides and examining the rules and the exhibit at issue, if the Bench Judge concedes an error, or if the Presiding Judge decides in favor of the Exhibitor, the Presiding judge may amend the decision, award(s), and/or official record in such a manner as to effect the most just result available. If, after hearing both sides and examining the rules and the exhibit at issue, the Presiding Judge decides the Bench Judge's original decision was correct, the Presiding Judge may uphold the Bench Judge's original decision. The decision of the Presiding Judge is final.

CLASSIC

QUEENLINE

***Notes on correct fill level:** The correct fill level on a “Queen-line” or “Classic” style honey jar is at the top of the fill ring of each jar. The fill ring is the raised ridge or ring of glass immediately above the shoulder of the jar, and below the threads. It can be distinguished from the threads in two ways: a) the fill ring forms a complete circle, without ends; and b) the fill ring will be completely parallel with the bottom and top of the jar. There should be enough honey in the jar to reach the top of the fill ring, without going over. Liquid honey in a circular shape forms a concave surface sometimes referred to as a meniscus. **For purposes of filling honey jars for exhibition, the edge of the meniscus should meet the top of the fill ring.** A jar of honey being over-filled is preferable to one being under-filled.
